PROFILE

A curious full stack developer driven by the unbeatable feeling of cracking a complex problem. A former chemical engineering student at Chalmers that moved into customer service and sales. A passion for programming and particularly for integrating different languages and technologies to develop complete solutions.

Independent, used to taking responsibility, thinking creatively, solving problems and seeing things from the customer's point of view. Most of the time it is as simple as finding the right question.

In my spare time I practice karate and wouldn't say no to a board game evening with friends. Or a beer down at the local.

SKILLS

Languages: C#, Python, JavaScript/TypeScript, HTML/CSS

Frameworks: .NET, .NET MAUI, ASP.NET, Entity Framework, Django, React, Svelte

Databases: PostgreSQL, Azure SQL, MS Access, CosmosDb

Tools: Azure, Docker, Git, GitHub, Visual Studio, VS Code, SCRUM,

EDUCATION

Chalmers University

2012-2015

Chemical Engineering

Teknikhögskolan Göteborg

2024-Current

.NET Developer

EXPERIENCE

Internship at Nexer

Jan - May 2026

Contributed to bringing an internal email-sending platform from development to production within an agile team. Implemented real-time collaborative editing with websockets and CRDT algorithms. Designed and queried a NoSQL data layer with Azure Cosmos DB, and worked with a clean architecture codebase. Integrated with Microsoft Graph and deployed to Microsoft Azure. Load and stress tested with Locust to find bottlenecks and system weak points.

Internship at EMCAP AB

Oct - Dec 2025

Developed and integrated a web search RAG (Retrieval-Augmented Generation) pipeline into EMCAP's existing chatbot, improving its ability to handle queries outside of training data. Researched and evaluated identity broker solutions for managing authentication and authorization across multiple services and identity providers.

Account Manager Telenor Prepaid

2018 - 2024

Thinking outside the box, daring to do what might be uncomfortable and having a finger on the pulse were important qualities.

Customer Support Telenor

2016-2018

Solution-oriented thinking, asking the right questions and understanding the customer were important to perform a good job. Qualities I have great use of in programming.
