TECHNIQUES & PLATFORMS

Languages & Frameworks: *C#, .NET, ASP.NET, Python, JavaScript, TypeScript, HTML, CSS, Svelte, React, .NET MAUI, Entity Framework*

Databases: *PostgreSQL, Azure Cosmos DB, Azure SQL, SQLite, MS ACCESS.*

Techniques & Standards: *REST, OAuth, Agile, Scrum*

Platforms & Tools: *Azure, Docker, Git, GitHub, Vs Code, Cursor, Antigravity, Linux, Windows*

PROFILE

I am a full stack developer with a focus on C# and .NET. Years of experience as an account manager and in customer service together with earlier chemical engineering studies at Chalmers gives me a unique combination of experiences.

My journey into software development began at Telenor, where I took the initiative to automate data workflows using Python to streamline sales operations. Today, I am passionate about building smart systems, taking ownership, and solving complex problems through curiosity and by asking the right questions.

WORK EXPERIENCE

Nexer JAN - MAY 2026
Backend Developer Internship

Contributed to bringing an internal email-sending platform from development to production within an agile team where I took the lead. Researched real-time collaborative editing and CRDT algorithms. Designed and queried a NoSQL data layer with Azure Cosmos DB, and worked with a clean architecture codebase. Integrated with Microsoft Graph and deployed to Microsoft Azure. Load and stress tested with Locust to find bottlenecks and system weak points to improve latency and reduce RU usage.

EMCAP OCT - DEC 2025
Full Stack Developer Internship

Developed and integrated a web search RAG (Retrieval-Augmented Generation) pipeline into EMCAP's existing chatbot, improving its ability to handle queries outside of training data. Researched, evaluated identity broker solutions and developed a prototype for managing authentication and authorization across multiple services and identity providers.

Workshop The Retail Agency 2018 - 2024
Account Manager @ Telenor

Solution-oriented thinking, asking the right questions and understanding the customer were important essential to delivering high-quality results. Qualities I have great use of in programming.

EDUCATION

Teknikhögskolan 2024 - Current
.NET Developer

Chalmers University of Technology 2012 - 2015
Chemical Engineering
